ATTENTION

This is a USER program. Other than requiring that it conform to submittal and review standards, no quality control has been imposed upon this program by DECUS.

The DECUS Program Library is a clearing house only; it does not generate or test programs. No warranty, express or implied, is made by the contributor, Digital Equipment Computer Users Society or Digital Equipment Corporation as to the accuracy or functioning of the program or related material, and no responsibility is assumed by these parties in connection therewith.

DOUBLE PRECISION AND FLOATING POINT INTERCHANGER

DECUS Program Library Write-up

DECUS No. 8-379 a

ABSTRACT

This is a subroutine for conversion of double precision to floating point format and vice versa. A routine to move the radix point in a double precision number to any location is also included as a separate subroutine.

EXTENDED ROTATE CHECKER

START AT(REV DP NOTATION): 0010\0000\0300 ROTATE NUM TO RADIX PLACE: 3 MAKE INCREMENTS OF (REV DP NOTATION): 0010\0000\0010
